电梯尺寸标注软件

功能需求

实现电梯尺寸标注软件的功能需求如下:

1. 预设尺寸标注: 软件可以标注预估尺寸

2. 实际尺寸标注: 软件可以让用户在图片中标注实际的电梯尺寸。

3. 备注: 两次标注互相关联, 要有历史存储功能。

4. P导出: 软件可以将标注好的图片保存在手机相册。

业务逻辑

- 数据收集:使用前端表单填写数据。
- 1. 当用户新建项目后,逐页填写电梯尺寸信息,将数据信息存储到 localStorage 中。
- 2. 使用localstorage实现当前项目和历史项目的增删改查
- 尺寸标注:将填写的数据渲染到图片的指定位置。
- 1. 当模式为 new 时,创建项目,当前项目信息被存储在 localStorage 中。
- 2. 当模式为 edit 时,从 localStorage 中获取当前项目信息,并渲染到图片中。
- 3. 标注完成后,将图片保存在手机相册。

项目结构

```
src/ # 主源代码目录

App.vue # Vue 应用的主组件

layouts/ # 布局组件目录

default.vue # 默认布局组件

locales/ # 国际化 (i18n) 文件目录

main.ts # 应用的入口文件

manifest.json # 应用的元数据,例如应用名称、版本号等

pages/ # 页面组件目录

pages.json # 定义应用的页面路由

static/ # 静态资源目录,例如图片、字体等

stores/ # 状态管理 (store) 文件目录

theme.json # 定义应用的主题
```

数据存储数据格式设计

```

代码重点

- 导出pdf的文件在 src/pages/pdf.vue
- 数据操作逻辑在 src/stores/store.ts

运行条件

- 1. 安装 node Node.js Run JavaScript Everywhere (nodejs.org)
- 2. 安装编辑器 Windows HBuilderX 文档 (dcloud.net.cn)
- 3. 打开源码,在cmd输入 npm install 安装依赖
- 4. 运行完,在 cmd 输入 npm run dev:app 开发模式下运行软件
- 5. 打包命令: npm run build:app
- 6. 真机运行, 打开 hbuilderx 导入项目文件的 dist 目录中的 dev/app 或 build/app
